Fluke Combo Kits

Fluke has created two new combo kits to help maximize your productivity and help you solve problems faster and reduce downtime, all with significant savings over buying each product individually. The products in each kit have been specifically selected for both troubleshooting and preventative maintenance applications.

Establishing preventative maintenance programs are becoming critical to maintaining the uptime of electrical equipment and can significantly reduce both planned and unplanned downtime. Unplanned downtime costs are difficult to calculate, but often significant. For some industries, it can represent 1% to 3% of revenue (potentially 30% to 40% of profits) annually.
